I am writing to you because my husband and son are both truck drivers and this issue about not allowing the XM stations to carry local weather and traffic reports affects us very much. Both of our trucks are equipped with XM radio because it enables them to keep up with situations that affect them greatly. We pay for this service and it would not be right for the N.A.B. to take this service away from us. Please reject the N.A.B.'s petition 04-160 that would severely limit XM's ability to provide the service that we pay for.
